

Thinking about a shade sail or privacy screen?

Is your back patio a south-facing oven?

Does the evening sun ruin your summer dinners?

Do you need a shady play area in the yard?

A shade sail could be right for you!

Things to think about

1. **Conceptual Design and Rough Budgeting:** What are you trying to achieve? How and when will this space be used? What is the budget you have to work with?
2. **Time frame:** From design to final installation, a new shade sail structure can take 4-8 weeks or more.
3. **Average residential pricing:** It all depends on what you need – Do you already have a design in mind? Will you install your own posts and eyebolts? Or do you need the whole job from design to fabrication and installation? How many and what size shade sails?
 - **Design:** 3D design, including shade analysis at various dates and times: starts at \$400
 - **Shade sail only:** a custom 15' by 15' shade sail with a 5 yr warranty runs from \$1,395 to \$2,700 including stainless steel connecting hardware.
 - **Complete:** Design, posts, wall mounts, shade sail, hardware and installation: Call for a quote.
